Modifying and Improving the Translation of the Vebko Amirkabir Company Website

Category	tester
Section	Default Setting
Language	English
Generated	2026-10-18

1 Imported Content

To Improve or modify the translation of the Vebko company's website, first, go to the address 79.127.52.162, after selecting the desired language (in this tutorial, French is used), download the corresponding Excel file. Without changing the file name, make the desired changes and then drag and drop the file back to the main page of the website.

After entering the Username and Password provided by the support team, the modification process will be completed.

Please note that each section on the website has a unique ID. If you are looking for a specific section in the Excel file and cannot find its location on the site, simply click on the section's ID, and it will be highlighted in green for you.

Additionally, by adding ?resx=true to the end of the address, you can view the IDs related to each section.

For example, you can find 61Resx in the Default sheet of the Excel file.

It is important to note that the downloaded Excel file is organized into sheets corresponding to the site's tabs.
